Reasons for Allowance

1. An amendment was received from the applicant on March 13, 2007.
2. Claims 1-5 have been canceled.
3. Claims 6-12 are allowed.
4. The following is an examiner's statement of reasons for allowance. The apparatus for deploying and recovering a towed line array as claimed is not shown or suggested in the prior art because of the use of an apparatus that is comprised of a cylindrical drum that is disposed within a vehicle for spooling a towed line array, an electric motor that operates to rotate said drum, an electro-mechanical winding guide that is synchronized in movement with said drum for guiding and retaining said array in a slidable manner, a plurality of stationary winding guides that are disposed within said vehicle for guiding said array, and a reverse thruster that is joined at an end of said array outside of said vehicle for propelling said array away from said vehicle.
5. The prior art as disclosed by Wood (US 5,119,751) shows the use of an apparatus for deploying and recovering a towed line array from a vehicle, said apparatus being comprised of a cylindrical drum located within said vehicle, an electric motor for rotating said drum, a winding guide that is synchronized in movement with said drum for guiding said array, and an external guide tube through which said array is guided. Loughnan (US 2,404,266) discloses an apparatus for deploying a cable from a vessel, said apparatus being comprised of a cylindrical drum for spooling a cable, a motor for rotating said drum, and a reverse thruster that is attached to one end of said

cable for propelling said cable away from said vessel. Newly cited reference by Wood (US 5,263,431) discloses as prior art an apparatus that is comprised of a cylindrical drum within a vehicle for storing a cable, a winding guide with a motor for guiding said cable to and from said drum, and a guide tube within said vehicle for guiding said cable. Therefore, none of the prior art cited shows or suggests the use of an apparatus for deploying and recovering a towed line array, said apparatus being comprised of a cylindrical drum that is disposed within a vehicle for spooling a towed line array, an electric motor that operates to rotate said drum, an electro-mechanical winding guide that is synchronized in movement with said drum for guiding and retaining said array in a slidable manner, a plurality of stationary winding guides that are disposed within said vehicle for guiding said array, and a reverse thruster that is joined at an end of said array outside of said vehicle for propelling said array away from said vehicle.

Conclusion

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication from the examiner should be directed to Exr. Lars Olson whose telephone number is (571) 272-6685.
